SUMMARY

Computer & Data Science senior at Penn State Harrisburg and Erie Insurance's inaugural Data Engineering Intern, experienced in building enterprise data pipelines, validating system migrations, and developing generative AI tools. Skilled in SQL, Python, SAS, and AWS. NSBE chapter president and AWS Certified Cloud Practitioner.

EDUCATION

Pennsylvania State University – Harrisburg **Middletown, PA**

B.S. in Computer Science, Concentration in Data Science *Expected May 2027*

GPA: 3.15 | Harrisburg Scholars Scholarship

CERTIFICATIONS & SKILLS

Certifications: AWS Certified Cloud Practitioner, SQL for Data Science – UC Davis
Languages: SQL, Python (pandas, NumPy), SAS, R
Cloud & Databases: AWS (S3, Glue, Athena), PostgreSQL, SQLite, MarkLogic
Data Engineering: ETL/ELT Pipelines, Medallion Architecture, Data Modeling (3NF, ERDs), Data Warehousing, Data Quality Validation, Data Lineage, Data Governance
Tools: Tableau, Qlik, Excel, DBeaver, Git (GitHub, GitLab), Agile/Scrum

WORK EXPERIENCE

Erie Insurance **Erie, PA**

Data Engineer Intern (First at Company) *May 2026 – Aug 2026*

- **Engineered 6 Business Auto reporting datasets** in SAS from bronze-layer AWS Athena data (Medallion Architecture), integrating legacy and modern policy systems across **185K+ policies, 11.7M+ forms, and 4.7M+ coverage records**.
- Datasets are used by Commercial Lines and fed daily into a custom Policy In Force GPT knowledge base.
- Validated MarkLogic 10-to-12 migration across **13 relational views**, documenting 14 categories of TDE XML changes and comparing up to 1,000 records across Production and Test with **zero downstream issues**.
- **Co-led an 8-person intern team** building a custom Data Governance GPT used by data teams across every department, replacing hours-to-weeks SME requests with instant natural-language answers.
- Built the GPT's instruction framework and 5 guardrails, and owned its **4,200+ glossary terms and 11 policies**, validated against 40+ test cases.

Beats by Dre | GitHub **Remote**

Data Analytics Extern *Oct 2025 – Jan 2026*

- Cleaned and explored **4,990 Amazon reviews** in Python (pandas, NumPy), mapping ASINs to products and engineering review-length and normalized-rating features; found longer reviews drew more helpful votes (**r = 0.37**).
- Built a TextBlob sentiment pipeline on **1,025 reviews** benchmarking Beats Studio Buds against **9 competitors** and used Gemini to summarize themes, surfacing battery life and connectivity as the top complaint drivers.

ThriftedByVic | GitHub **Remote**

Founder & Operator *Nov 2022 – Present*

- Founded and operated an e-commerce resale business generating **$28.5K+** in revenue with 2,000+ items sold across Depop, Mercari, and Poshmark; sourced inventory only when resale value was at least **3x cost** and maintained a 5-star seller rating.
- Built a SQLite database from a sample of 114 sales and wrote SQL in DBeaver to compare pricing and volume across platforms; found Mercari averaged **38% higher** prices than Depop while Depop drove **85%** of volume.

LEADERSHIP EXPERIENCE

National Society of Black Engineers (NSBE) – Penn State Harrisburg **Middletown, PA**

President *May 2026 – Present*

- Lead a **30-member** chapter and 10-person Executive Board, and designed the **Torch Token** member accountability and engagement system.
- Secured Penn State Harrisburg as host of the NSBE Region 2 Danger Zone Summit, welcoming **~80 attendees from 6 universities** across **6 workshops**.
- Selected by Region 2 leadership as one of **~13 chapter presidents nationwide** to join a national working group with corporate partners on convention timing and recruiting.

Vice President *Jan 2026 – May 2026*

- Co-led chapter alongside President, overseeing an 8-person Executive Board and 2 chapter-wide volunteer initiatives.

PROJECTS

Does Education Level Predict Earnings? (PSEO Analysis) | GitHub **Feb 2026 – Apr 2026**

- Wrote the SQL to clean **10,978 Census PSEO earnings records** from 25 PA institutions: narrowed **185 fields of study to 20 majors**, removed Census-suppressed records (~**62%** of rows), and standardized major labels across degree levels.
- Team regressions on Year 10 earnings showed degree level alone explains **27%** of variance (**+$22.8K** per degree step, $p < 0.001$) and **85%** once major is controlled; presented 5 majors and co-wrote the methodology.

Beverage Buddy Database System **Feb 2025 – Apr 2025**

- Wrote PostgreSQL DDL for **4 of 9 tables** in a 3NF schema for a diabetes-friendly beverage app, enforcing composite primary keys, cascading foreign keys, and CHECK constraints.
